Prices do not include applicable taxes, or surcharges. All prices subject to change. Service availability and Internet speed will depend on location. Contact us for complete details.*

PROPER WAY TO DISPLAY THE FLAG

November 11 is Veterans Day. As we prepare for this day, many people want to proudly display the American flag but aren't sure of the rules associated with this. For handy reference, here's a brief list of guidelines according to the United States Flag Code:

- It is the universal custom to display the flag only from sunrise to sunset. However, the flag may be displayed 24 hours a day if properly illuminated during the hours of darkness.
- The flag should be flown in fair weather, unless the flag is designed for inclement weather use.
- When displayed either horizontally or vertically against a wall, the union should be uppermost and to the observer's left.
- The flag should never be displayed with the union down.
- The flag should never touch anything beneath it such as the ground or the floor.
- Never use the flag as wearing apparel, bedding, or drapery.
- When a flag is in such condition that it is no longer a fitting emblem for display, it should be destroyed in a dignified way, preferably by burning.

For additional information, visit www.usa-flag-site.org/etiquette-display.

Household Broadband Guide From the FCC

How much speed do you need? The folks at the Federal Communications Commission (FCC) have put together this helpful chart to compare minimum download speeds required for light, moderate, and high household use with one, two, three, or four devices at a time.

	Light Use (Basic functions only: email, web surfing, basic streaming video)	Moderate Use (Basic functions plus one high-demand application: streaming HD, video conferencing, OR online gaming)	High Use (Basic functions plus more than one high demand application running at the same time)
1 user on 1 device (e.g., laptop, tablet, or game console)	Basic	Basic	Medium
2 users or devices at a time	Basic	Basic	Medium/Advanced
3 users or devices at a time	Basic	Basic/Medium	Advanced
4 users or devices at a time	Basic/Medium	Medium	Advanced

As a general rule of thumb, the FCC suggests the following speed ranges for the different levels of household use:

- **Light Use:** Basic Service = 1 to 2 Mbps
- **Moderate Use:** Medium Service = 6 to 15 Mbps
- **High Use:** Advanced Service = More than 15 Mbps

For additional information on broadband speeds, visit www.fcc.gov/guides/broadband-speed-guide. To sign up for a faster connection, call SCC Networks at 800-782-7932.

Respect Copyrighted Material and Avoid Digital Piracy

With so many options out there for viewing movies and TV shows online, it can be confusing to find the real thing — content that doesn't involve copyright infringement. In addition, others could be using your Internet account without your knowledge to conduct illegal activities. It's important you understand that downloading pirated content through a site like BitTorrent is illegal and organizations are actively protecting these rights.

For example, the Copyright Alert System (CAS) is designed to help consumers understand when files may have been shared illegally on peer-2-peer (P2P) networks through their Internet accounts. According to www.copyrightinfringement.org, "artists, moviemakers and other owners of content join public P2P networks to see if the music, movies, and TV shows they've made available are being shared without permission and in violation of U.S. copyright law. If they notice that a file is being shared illegally, they notify the appropriate Internet Service Provider (ISP) and that ISP, in turn, passes on that notice to their subscriber as a Copyright Alert."

If you are alerted about unlawful content sharing, we trust that you will take the appropriate steps to correct the situation. To help avoid these issues in the future, be cautious when websites make offers that are "too good to be true" and be wary of "free" content when searching for and purchasing downloads from unfamiliar sites. Watch out for terms like "Unlimited Movie Downloads," "100% legal," and "Millions of Files Shared."

As you look for entertainment online, remember to be respectful of the artists' work and keep your downloading within legal parameters. If you have questions about digital piracy, call SCC Networks at 800-782-7932.

SNEAK PEAK: 12 DAYS OF GIVEAWAYS!

Join SCC Networks on the GRM Networks Facebook for our 12 days of Giveaways in December! Starting December 8, 2014, SCC Networks will give away 12 prizes leading up to the Christmas holiday. Make sure you follow us at www.facebook.com/grm.net to get more information on how to enter.

No purchase necessary to enter or win. Void where prohibited.

YOUR LANDLINE OFFERS MORE CALL PRIVACY

One of the benefits of having a landline phone is the added privacy and security it provides. Why? It's much easier for hackers to gain access to conversations on a cellular phone or through VoIP (Voice over Internet Protocol) than it is to access a traditional phone line.

For example, some cellular phones use analog radio frequencies that can be easily intercepted using simple scanning devices. The eavesdroppers could listen to your private conversations, write down your credit card information, or find out when you'll be on vacation to plan a burglary. A landline phone is a more secure choice when you're going to be discussing financial accounts or other private information.

To learn more about landline service, call 800-782-7932.

SKITTER TV FROM SCC NETWORKS IS COMING SOON!

Although pricing is still being finalized, SCC Networks can confirm it will offer tiered packages so you can choose to pay a lower price for fewer channels.

You will have set top box options, including the ability to record, pause and rewind live TV programs.

If you wish to be notified when Skitter TV is available, please send an email to web@grm.net with name, address and contact phone number; or call your local business office at 1-800-782-7932 and request to be added to the notification list.

Channels available on Skitter TV will include:

- Local networks including ABC, NBC, CBS and FOX and more in some areas!
- Disney
- Comedy Central
- TBS
- TNT
- FX
- CNN
- USA
- ESPN
- History
- RFD TV
- Outdoor Channel
- HGTV
- Discovery
- Food Network
- And more!
- Nickelodeon
