

## FOR IMMEDIATE RELEASE!

August 12, 2014

GRM Networks has been informed that some of our customers have been contacted by companies from outside our serving area claiming to do computer maintenance. These companies claim to offer a service to remotely access, run a cleanup program and install security software to your computer. If you do not initiate the request, do not allow anyone to remotely access your computer. Protecting your computer is very important and every computer should have a security program to protect it from malicious actions. DO NOT trust a company that calls you unexpectedly offering to help clean up your computer. Individuals involved in this type of activity are not looking out for your best interest. They are looking for an easy way to steal personal information. If you have questions or concerns about your computer protection, please call GRM Technical support at 1-800-721-2577.
