# CO-OP MONTH | OCTOBER 2016

GRM Networks® is a rural telephone cooperative serving your community. Rural co-ops were formed when the cost of expanding service to rural areas discouraged for-profit utilities from serving these areas. Today, telephone cooperatives serve about 5 percent of the U.S. population, but their service area covers more than 40 percent of the country's land mass.

## 7 Co-op Principles

1. Owned by the people who use their services.
2. Not-for-profit entities that operate for the economic benefit of their members.
3. Democratic organizations controlled by their members.
4. Independent, self-help organizations.
5. Provide education, training, and awareness on their form of business.
6. Support each other for the benefit of their communities.
7. Focus on developing and giving back to their communities.
